Problem

describing the problem

Description of the given problem

We were given task to create Hotel website in 2 weeks. We had a free hand in almost everything, so we could show our creativity. We decided to make double-page, having sliders, "about", "opinions" and "location" section.

02

Technologies

technologies used in project

Figma

Figma is a vector graphics editor and prototyping tool which is primarily web-based.

We used it to design our entire application, and then, in accordance with the previously created framework, we designed the entire application.

Angular

Angular is a platform and framework for building client applications using **HTML** and **TypeScript**.

It implements core and optional functionality as a set of **TypeScript** libraries that you import into your applications.

TypeScript

strict syntactical superset of **JavaScript** and adds optional static typing

SCSS

preprocessor scripting language that is interpreted or compiled into **CSS**

HTML

standard **markup language** for documents designed to be displayed in a web browser

“Very good, very nice!”
– **Wiktor**

To sum up, it was pleasant and great experience to have internship here, in Ipodomi. The staff was really kind and open to working with us and working atmosphere was chill and comfortable. Overally I think everyone of us learned a lot and are happy with our stay.

A picture is worth more than thousand words

Thanks!

Thanks for the last two weeks.
It was an honor to work in your company!
